

Working Together

Bulk Fuel and Lubricants Storage

Total Fuel and Lubricants Management Solutions

Safeguarding your assets. Protecting your business.

Always Certas

Keeping your business moving

We are the UK's largest independent supplier of fuel and lubricants, delivering a competitive, responsive service that ensures your business never runs out of fuel.

We've got all your requirements covered with a full range of robust, high performance storage products and efficiency-enhancing support services to help keep your fuel and lubricants safe and secure.

Creating partnerships that start by really understanding your fuel needs and priorities, we take a collaborative approach; listening carefully to appreciate your business challenges fully and, where appropriate, suggesting fuel products and services to help you achieve your operational and commercial goals whilst future-proofing your investment.

Making it easy to **maintain, move and store** your **fuel and lubricants**

National network, regional presence, local delivery

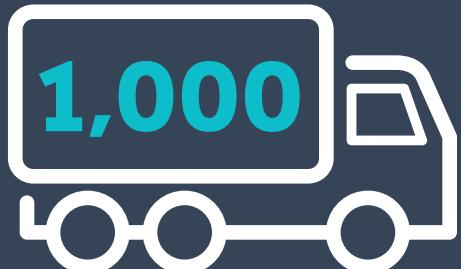

Operating a national network that delivers a competitive, responsive local service, we ensure that your business' storage needs are covered and of course, that you never run out of fuel.

**Our robust infrastructure
assures reliable supply of
all your fuel and lubricants
products nationwide.**

2,500 employees

tankers

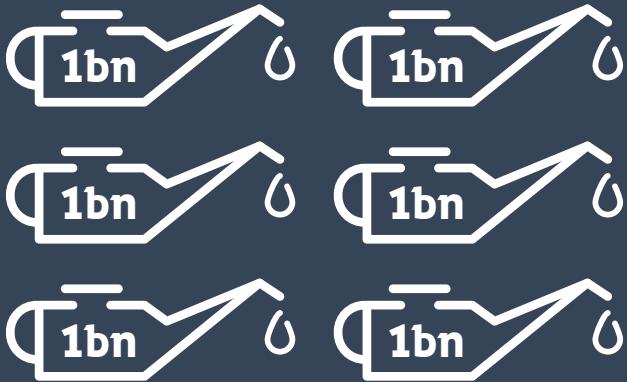

130 depots

6 billion

**litres of high quality fuel
and lubricants delivered
throughout the UK each year**

Keeping your business moving, whatever your sector

Construction

Fixed and transportable storage plus usage monitoring and management options – keeping construction sites safe, secure and moving.

Agriculture

Meeting the storage demands of challenging farm environments – all year round.

Transport

Servicing haulage, commercial fleet and all transport storage requirements efficiently and cost-effectively.

Industrial

Tailored storage for manufacturing plants, national headquarters, warehouses and office units.

Public sector

From healthcare to local services, infrastructure to the emergency services – safe storage solutions that deliver results.

How can we help you?

Creating the right storage solution

We understand how important it is to match your requirements with the right bulk fuel storage solution.

Our Technical Teams support all aspects of fuel management from product choice and security to spill management and fuel monitoring. Expert advice to ensure compliance, safety, reliability and cost-efficiency is always available and we can help with installation guidance, including on-site contract lift support, and on-going maintenance when needed.

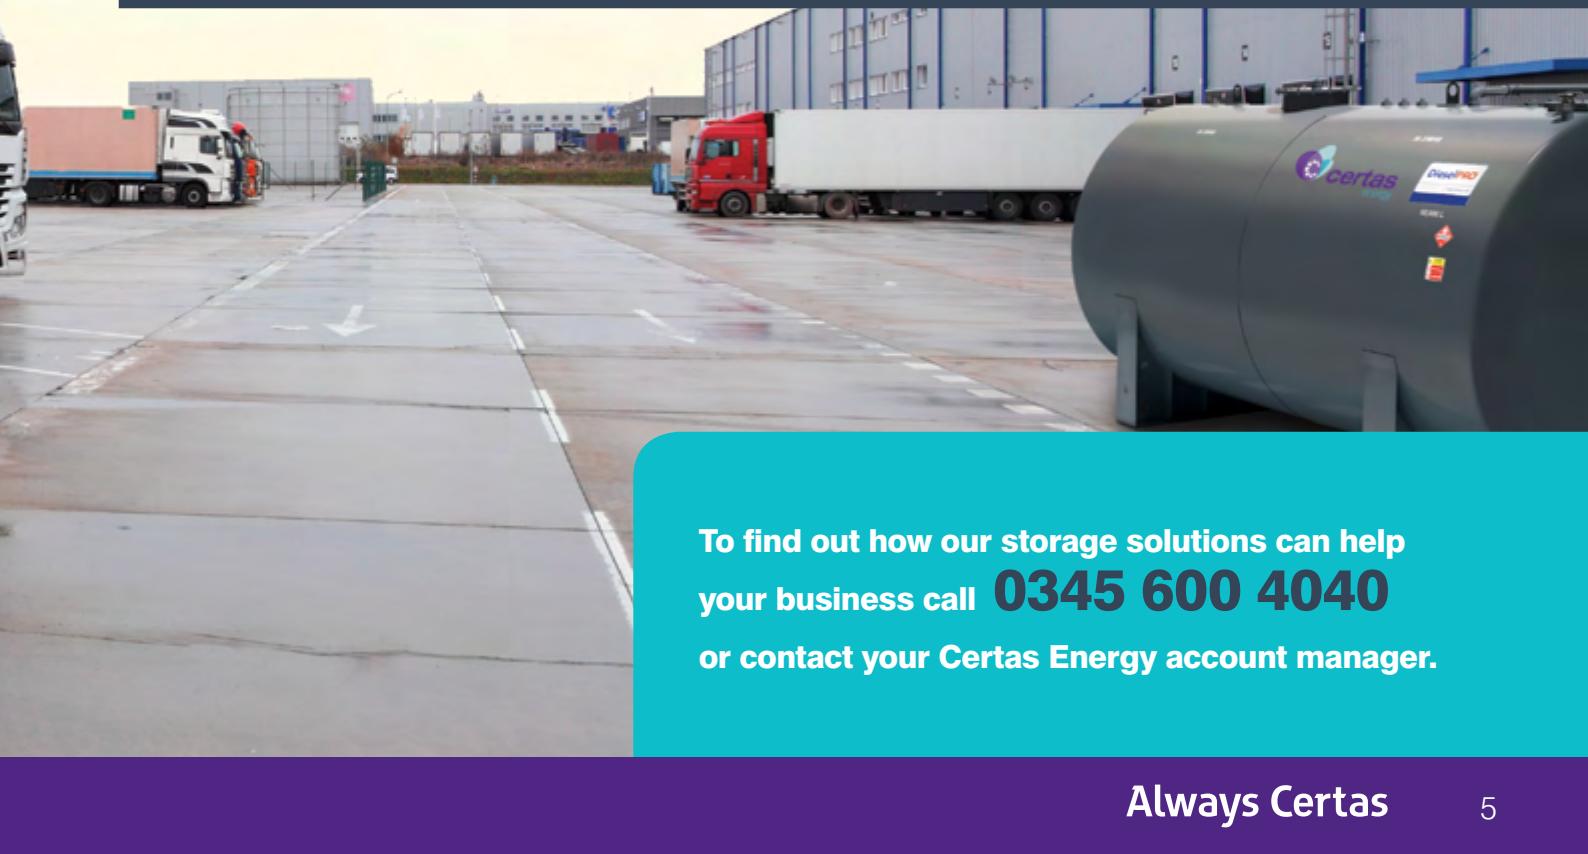

All our engineers are OFTEC registered, and if required, we can provide an on-site survey to ensure you are choosing the correct solution for your needs (survey is free of charge when storage solution is purchased).

- Intelligent Fuel Monitoring, Management and Security
- Installation and Maintenance
- Fuel Polishing and Tank Cleaning
- Technical Support and Reliable Customer Service
- Commercial Fuel, Lubricant and Additive Supply

What we need to know...

To help ensure the best match for your storage and dispensing needs, we'll understand your requirements based on:

- Site information
- Usage and capacity
- Flow rates
- Above or below ground
- Dispensing needs
- Telemetry activation
- Fuel management needs and number of users

To find out how our storage solutions can help
your business call **0345 600 4040**
or contact your Certas Energy account manager.

Products that perform

Customised, integrated storage solutions

A full range of storage solutions is available; all are 110% integrally bunded to comply with oil storage regulations. Our reliable range includes:

- Steel tanks
- Durable plastic dispensing tanks
- Transportable cube tanks
- Containerised tanks
- Fuel stations and bowsers
- Bespoke tanks

Flexible payment options

Helping you to keep your business running smoothly, various payment options are available to suit your needs.

Equipment can either be purchased upfront, or lease purchased – spreading the cost with flexible payment plans to ensure costs can be managed easily.

Avoid one-off costs with short or longer term leasing

Tanks can be leased on a two to five year agreement, helping you avoid one-off costs and giving you peace of mind that your tank is always safe, functional and fully compliant.

World-leading tank storage and accessories

Tailored to your requirements

From tank size, shape and material to dispensing options, fuel management and security, whatever you need, we've got it covered.

Working in a strategic partnership with Kingspan Energy Storage Solutions*, our world-leading products offer revolutionary ways to store, dispense and protect fuel for a wide range of applications.

With a diverse range of environmentally responsible steel and plastic storage tanks accommodating capacities from 200 to 62,000 litres (or larger as a bespoke option), we are able to offer reliability, flexibility and the control your organisation needs for a stable and assured fuel supply.

* With some of the range supported with specialist products from Western Global

Steel tanks

Capacity	5,000 – 62,000 litres with bespoke larger options available
Shapes	Rectangular, cylindrical, horizontal and vertical
Dimensions	Various (tank dependent) – detailed data sheets available for each tank
Safety/security	110% integrally bunded
Fuel management	All units fitted with a TMS300 as standard, which includes: <ul style="list-style-type: none"> • Live litre read out • High level alarm • Low level alarm • Bund alarm • Built-in WAP functionality • Full fuel management system available, which includes the above functionality whilst also offering a FOB and key code system, unlimited data storage and full software package with comprehensive range of reports available
Supply	Supply only / Supply, install and maintain
Product storage	Kerosene, derv, gas oil, lubricants and coolants
Design	Robust, high quality and secure
Dispensing	Different dispensing options available to tailor to your site's needs

Plastic tanks

Capacity	200 – 9,000 litres
Shapes	Rectangular, cylindrical, horizontal and vertical
Product storage	Kerosene, derv, gas oil, lubricants and coolants
Dimensions	Various (tank dependent) – detailed data sheets available for each tank
Safety/security	Static tanks are 110% integrally bunded
Options	Static and portable options – can be fitted with various dispensing systems and telemetry

Transportable tanks Driving down risk and cost

With a range of transportable options including bowsers and transportable cube tanks, we can make your site safer and your everyday operations easier and more efficient, ultimately driving down costs and risk.

Types	Transportable Cube, Bowsers (easily demountable from trailer)
Capacity	950 – 2,900 litres
Product storage	Derv, gas oil
Dimensions	Various (tank dependent) - detailed data sheets available for each tank
Safety	110% integrally bunded to ensure environmental compliance
Security	Secure lockable access
Options	Can be fitted with various dispensing systems and telemetry option

Containerised tanks Versatile storage options

The smaller containers can easily be transported and stacked to provide efficient and safe fuel supply for many applications including machinery, generators and pumps.

Capacity	5,300 – 56,000 litres
Transportable	Dimensions and features allow mobility
Safety	110% integrally bunded to ensure environmental compliance and split fuel compartments to meet regulations
Security	FOB and key code options and lockable cabinet houses
Storage	Ability to stack 6 high when storage space is limited and store multiple products with split fuel compartment capability
Dispensing	Different dispensing options available to tailor to your site's needs

Bespoke tanks

A bespoke tank build and design service is available to suit all business needs should you have any special requirements.

Bespoke options include:

- Split compartments for storing more than one fuel
- Made-to-measure tanks to fit specific locations
- Different outlets, pumps and dispensing units – all can be made bespoke
- A variety of different options are available – site visits can be undertaken to ensure your business needs are matched with the best solutions

Accessories / dispensing (steel tanks only)

With three, state-of-the-art dispensing option packages available, plus a host of other optional extras around pumps, dispensing hoses, pump houses and other storage add-ons, all your requirements can be met easily.

Dispensing unit options:

- Mechanical flow meter with calibration adjustment
- 10 micron water and particulate filter
- Heavy-duty steel suction pipe
- Swivelling outlet hose fitting
- 4m premium anti-static delivery hose
- Swivelling auto-nozzle
- Low-level pump cut off
- Bulkhead light
- 80 litre or 50 litre/ minute pumping arrangements – 230v, 12v or 24v
- Electric flow meter calibration
- Reel

A variety of tank accessories including fuel gauges and tank locks are also available.

Security, monitoring and management

Designed to control, monitor and accommodate the efficient storage and dispensing of kerosene, diesel, gas oil and lubricants, award winning fuel monitoring and management telemetry options are available. If security is an issue, tanks can be supplied with a fuel management package including fobs, locks and key codes.

These intelligent solutions provide stock visibility, traceability, sudden drop and leak alerts and are available on all products to give you a fuel management solution for total peace of mind. This means that you never need to worry about running out of fuel as you can monitor your usage levels wherever you are.

Benefits for your business

- Improved security
- Improved staff protection
- Avoids insurance premiums and accident claims
- Eliminates the need for manual measurements and over-filling
- Automate deliveries
- Receive timely and accurate data for efficient purchases
- Monitor liquid levels anywhere via fuel monitoring app

Robust products, manufactured for high performance

We know our fuel storage products can be located in some of the most demanding environments, which is why they are designed and engineered to meet and exceed local environmental guidelines, fuel storage standards and manufacturing regulations.

Additional certification standard examples:

- BS799 Part 5 (Rectangular Steel Tanks)
- EN12285-2 (Cylindrical Steel Tanks)
- OFST200 (Steel Tanks)
- OFST100 (Plastic Tanks)

Manufacturing standards:

- Manufactured under an ISO9001 quality management system
- ISO14001 environmental management system
- DFT paint tested (Steel Tanks)

Guarantees for commercial assurance

For complete commercial peace of mind, our steel tanks include a 15-year guarantee and our plastic tanks have a 10-year guarantee, with all ancillary products supplied with a 24-month warranty.

Always innovating

Working in partnership with Kingspan, we invest heavily in research and development to create a diverse range of innovative, environmentally friendly and reliable oil, diesel, lubricant and AdBlue® storage solutions suitable for the most demanding of situations.

Your peace of mind, guaranteed

Previously price was often the first consideration when investing in a new tank, however security, health, safety and environment considerations are now paramount when selecting the right storage solution.

Working together to make health and safety our priority

Health and safety is fundamental to our business performance, as well as being our commitment to you. We're dedicated to preventing injuries to our commercial customers, colleagues and others who may be affected by our activities.

Fully compliant with all applicable legislation and industry codes of practice as a minimum standard, we strive to achieve industry best practice and continual improvement in our health and safety performance.

Our management systems are robust through accreditations in health and safety (BS OHSAS 18001) quality (ISO 9001) and environmental management (ISO 14001).

And, our culture of strong safety and compliance principles drives our dedicated Safety F1rst and Doing the Right Thing campaigns.

We are members of the Fleet Operator Recognition Scheme (FORS). This assures that when it comes to fleet operation our approach to safety, efficiency, and environmental protection meets exacting standards and demonstrates our commitment to measuring, monitoring and improving our performance.

A cleaner, safer approach

Mindful of the challenging environmental targets, pressure to reduce pollution and the increasing environmental regulations compliance that businesses today face, we can help you to make smart, well-informed fuel and fuel storage choices.

Continual commitment to improvement

As a responsible business, we are working alongside our forward-thinking strategic partners to balance issues of performance and pollutant concerns, whilst delivering genuine cost-effectiveness.

Most recently our commitment to carbon neutrality and energy management system was awarded ISO15001.
