

# Keeping the marine industry moving

Supplier of fuel and lubricants  
for the marine industry

**Our MARPOL and SOLAS compliance ensures all products we supply adhere to current legislation and we work hard to maintain our efficiency, quick deliveries and competitive pricing, offering you our best possible service.**

## Who is Certas Energy?

We are the UK's largest independent supplier of fuel and lubricants, operating a national network that delivers a competitive, responsive local service ensuring that your vessel never runs out of fuel.

### Meeting your marine needs

Keeping up to date with the wider marine industry to understand the changing political, environmental and financial challenges our customers face means that we work with you to create partnerships that really understand your needs and priorities; recommending fuel products and services that help you fulfil your requirements.

### Reliable, local teams - regional presence - national network support

Making our expertise and outstanding service count for our customers, our main aim is to provide you with the right products and services that together with local support, make it easier for you to run your vessel efficiently.

Trusted by marine customers throughout the UK, our local teams work closely with you to assure reliable and competitive supply of all your marine fuel and lubricants.

Our local drivers, depots and specialists ensure we can reach the majority of ports throughout the UK.

# 6 billion

litres of high quality fuel and lubricants delivered throughout the UK each year

## Why use Certas Energy?

### Established local service - help and friendly advice always available

With 130 depots across the UK, our local specialists work with you to fully understand your needs. From offering fuel, lubricants and additives to helping you place your order, developing trusted and valued working relationships with our customers is what's important.

We understand how important it is to receive your delivery when promised. With 900-strong fleet of delivery vehicles nationwide, we work hard to meet your delivery needs to ensure that you never run out of fuel.

### Refinery quality fuels

All fuel is marine compliant with a flash point above 60% and is FAME free.

### Bespoke ordering and pricing

We offer floating prices, forward pricing, monthly and weekly averages and spot pricing depending on your preferences. Pricing can be offered in ppl, Dollars, British Pounds Sterling or Euros per tonne.

### A responsible approach

We take our responsibility seriously, reducing the environmental impact of our operations.

- ✓ Minimising waste
- ✓ Protecting biodiversity
- ✓ Reducing harmful emissions
- ✓ Providing training and development
- ✓ Creating local employment opportunities
- ✓ Investing in the communities in which we operate

# Products that perform Service that keeps your vessel on the move

We know how important it is to keep your vessel moving. Whether it's keeping your vessel properly lubricated throughout the year, having the correct additives to store your vessel over winter or accessing a reliable fuel supply when you need it, we've got you covered.

## Lubricants

Approved by leading OEM (Original Equipment Manufacturers) including MAN, Wartsila, Cummins, Sulzer and Vickers, we supply lubricants from leading global manufacturers Shell, Castrol, Gulf and Valvoline to ensure that you have access to a range of high quality products to suit your needs.

Within the largest independent logistics and distribution network, you can rely on us to deliver stocked products within five working days – next day and emergency deliveries are also available.

- ✓ Engine oils
- ✓ Hydraulic oils
- ✓ Transmission and gear oils
- ✓ Cylinder oils

Shell Lubricants  
Authorised Distributor

## Additives

Additives help you reduce the cost of maintaining and replacing your machinery, as well as saving you money by improving your fuel's performance and minimising storage problems and waste. The range includes:

- ✓ Anti-bug kill
- ✓ Anti-bug protect
- ✓ Power restorer
- ✓ Fuel store plus

Our dedicated technical team ensure that you use only the best-suited products for your equipment – reducing wear and tear and ensuring optimum output and lifespan.

## Working together to keep health and safety a priority

Health and safety is paramount to us – it is fundamental to our business performance, as well as being our commitment to you.

## Working together to make health and safety our priority

Always committed to preventing injuries to our customers, colleagues and others who may be affected by our activities, our culture of strong safety and compliance principles drives our dedicated Safety First and Doing The Right Thing campaigns.

Fully compliant with all applicable legislation and industry codes of practice as a minimum standard, we strive to achieve best practice and continual improvement in our health and safety performance – whether it's ensuring safe deliveries of fuel to making sure our drivers operate safely on the roads.

Our management systems are backed up by our accreditations in health and safety (BS OHSAS 18001) quality (ISO 9001) and environmental management (ISO 14001).

## Continual commitment to improvement

Most recently our commitment to carbon neutrality and energy management system was awarded ISO15001.

We are also members of the Fleet Operators Recognition Scheme (FORS), which assures our approach to safety, efficiency and environmental protection in our fleet operation, combined with a commitment to measure, monitor and improve our performance.

## Making cleaner fuel choices

On 1 January 2020, a significant reduction in the sulphur content of the fuel oil used by ships will be implemented as the 3.5% m/m (mass by mass) global limit currently in place is cut to 0.50% m/m (mass/mass).

**Marine Gas Oil (MGO):** Refined from crude oil, Gas Oil is a middle distillate liquid. There are two recognised standards of gas oil:

**Class A2/ULSGO:** Class A2 gas oil is also known as ULSGO (ultra-low sulphur gas oil). Class A2 meets the current BS2869 and ISO 8217 specifications and has a maximum sulphur content of 10ppm (0.001%).

**Class D:** Class D has a maximum sulphur content of 1000ppm and meets the current BS2869 and ISO 8217 specifications. Also known as 1000ppm, 0.1% or LSGO (low sulphur gas oil).

**Shell GTL (Gas To Liquid):** Certas Energy is the sole distributor of Shell GTL Fuel in the UK. This paraffinic fuel offers a cleaner-burning alternative for use in diesel engines. Suitable for off-road applications, it both lowers emissions and improves air quality and can be used as a direct replacement for conventional diesel fuels with no modifications needed.

The GTL technology lowers local emissions of regulated pollutants: Particulate Matter (PM), Nitrogen Oxide (NOx), Carbon Monoxide (CO) and Hydrocarbons.

**Liquefied Natural Gas (LNG):** LNG is created by cooling natural gas to an extremely low temperature (-162°C). This cooling process turns the gas into a liquid that takes up 600 times less space than when it's a gas. This means it requires less storage capacity. It's incredibly lightweight, too. In fact, it's lighter than water - which makes it easier to get to you.

What's more, it's non-toxic and non-polluting – which means a safer, more environmentally friendly fuel for your business. All of these benefits make LNG ideal for off-grid high energy user looking for a cleaner, greener, more cost-effective alternative to oil.

**With depots spread throughout the UK and close to major ports including the Isle of Wight, Isle of Man, Orkney and Shetland Islands, you can rest assured that Certas Energy can cover all of your bunkering needs.**

Alongside road deliveries to almost every UK port, we also have bunkering facilities at:
