

# Storage, dispensing and monitoring solutions

Safeguarding your assets  
Protecting your business

## Keeping your business moving

### National network, regional presence, local delivery

We are the UK's largest independent supplier of fuel and lubricants, delivering a competitive, responsive service that ensures your business never runs out of fuel.

We've got all your requirements covered with a full range of robust, high performance storage, dispensing and monitoring products and services to help keep your fuel and lubricants safe and secure.

Creating partnerships that start by really understanding your fuel needs and priorities, we take a collaborative approach; listening carefully to appreciate your business challenges fully and suggesting fuel products and services to help you achieve your goals whilst future-proofing your investment.

Assured supply, robust infrastructure and supplier partnerships supporting our customers nationwide

2,500 employees

900 tankers

150 local depots

16 bunker refuelling sites

6 billion

litres of high quality fuel and lubricants delivered throughout the UK each year

## Making it easy to store, dispense, monitor and move your supply, whatever your sector

### Construction

Fixed and transportable storage and dispensing plus usage monitoring and management options – keeping sites safe, secure and moving.

### Agriculture

Meeting the storage and dispensing demands of challenging farm environments to keep assets safe and secure – all year round.

### Transport

Servicing haulage, commercial fleet and all transport storage, dispensing and monitoring requirements efficiently and cost-effectively.

### Industrial

Tailored storage for manufacturing plants, national headquarters, warehouses and office units.

### Public sector

From healthcare to local services, infrastructure to the emergency services – safe storage and dispensing solutions that deliver results.

## How can we help you?

### Creating the right tank and monitoring solution

We understand how important it is to match your requirements with the right storage, dispensing and monitoring solution.

Our Technical Teams support all aspects of fuel management from product choice and security to spill management and fuel monitoring. Expert advice to ensure compliance, safety, reliability and cost-efficiency is always available and we can help with installation guidance, including on-site contract lift support, and on-going maintenance when needed.

All our engineers are OFTEC registered, and if required, we can provide an on-site survey to ensure you are choosing the correct solution for your needs.

- Intelligent fuel monitoring, management and security
- Installation and maintenance
- Fuel polishing and tank cleaning
- Technical support and reliable customer service
- Commercial fuel, lubricant and additive supply
- Spill kits

### What we need to know...

To help ensure the best match for your needs, we'll understand your requirements based on:

- Site information
- Usage and capacity
- Flow rates
- Above or below ground
- Dispensing needs
- Telemetry activation
- Fuel management needs and number of users

## Products that perform

### Compliant and tailored to your requirements

From tank size, shape and material to dispensing options, fuel management and security, whatever you need, we've got it covered.

Working in partnership with Kingspan Energy Storage Solutions for our plastic range, and many other reputable tank suppliers for our transportable and steel range, our world-leading products offer revolutionary and environmentally responsible ways to store, dispense and protect fuel for many applications.

Accommodating capacities from 200 to 62,000 litres (or larger as a bespoke option), we are able to offer reliability, flexibility and the control your organisation needs for a stable and assured fuel supply.

## Flexible payment options

Helping to keep your business running smoothly, we offer various payment options to spread the cost in line with your requirements.

With upfront purchase or purchase included within your fuel supply based on volume commitment across 1 - 5 years, we give you peace of mind that your tank is always safe, functional and fully compliant, regardless of payment preference.

## Steel tanks

<b>Capacity</b>	5,000 – 62,000 litres with bespoke larger options available
<b>Shapes</b>	Rectangular, cylindrical, horizontal and vertical
<b>Dimensions</b>	Various – detailed product sheets available for each tank
<b>Safety</b>	110% integrally banded to ensure environmental compliance
<b>Fuel management</b>	Steel tanks can be fitted with various fuel management options including: <ul style="list-style-type: none"> <li>• Live litre read out</li> <li>• High and low level alarms</li> <li>• Bund alarm</li> <li>• Built-in fuel monitoring functionality</li> <li>• FOB and key code system</li> <li>• Unlimited data storage</li> <li>• Weights and measures</li> <li>• Cloud-based</li> <li>• Reporting</li> </ul>
<b>Supply</b>	Supply only or supply, install and maintain
<b>Product storage</b>	Kerosene, diesel, gas oil, lubricants and coolants
<b>Design</b>	Robust, high quality and secure
<b>Dispensing</b>	Different dispensing options available tailored to your needs

## Plastic tanks

<b>Capacity</b>	200 – 9,000 litres
<b>Shapes</b>	Rectangular, cylindrical, horizontal and vertical
<b>Product storage</b>	Kerosene, diesel, gas oil, lubricants, AdBlue and coolants
<b>Dimensions</b>	Various – detailed product sheets available for each tank
<b>Safety</b>	Static tanks are 110% integrally banded to ensure environmental compliance
<b>Options</b>	Static and portable options – with dispensing, fuel monitoring and management additions available

## Transportable tanks

With a range of transportable options including bowzers and transportable cube tanks, we can make your business safer and your everyday operations easier and more efficient to drive down costs and risk.

<b>Types</b>	Transportable cube, bowzers
<b>Capacity</b>	950 – 2,900 litres
<b>Product storage</b>	Diesel, gas oil, AdBlue®
<b>Dimensions</b>	Various – detailed product sheets available for each tank
<b>Safety</b>	110% integrally banded to ensure environmental compliance
<b>Security</b>	Secure lockable access
<b>Options</b>	Different dispensing, fuel monitoring and management options available tailored to your needs

## Containerised tanks

The smaller containers can easily be transported and stacked to provide efficient and safe fuel supply for many applications including machinery, generators and pumps.

<b>Capacity</b>	5,300 – 56,000 litres
<b>Transportable</b>	Dimensions and features allow mobility
<b>Safety</b>	110% integrally banded to ensure environmental compliance and split fuel compartments to meet regulations
<b>Security</b>	FOB, key code and lockable cabinet options available
<b>Storage</b>	Ability to stack six high when space is limited and store multiple products with split fuel compartment capability
<b>Dispensing</b>	Different dispensing options available tailored to your needs

## Accessories and dispensing

With many state-of-the-art options available, plus a host of other optional extras around pumps, dispensing hoses, pump houses and other storage add-ons, all your requirements can be met easily.

### Dispensing unit options

- Mechanical flow meter with calibration adjustment
- 10 micron water and particulate filter
- Heavy-duty steel suction pipe
- Swivelling outlet hose fitting
- 4m premium anti-static delivery hose
- Swivelling auto-nozzle
- Low-level pump cut off
- 80 litre or 50 litre per minute pumping arrangements – 230v, 12v or 24v
- Electric flow meter calibration
- Bulkhead light
- Reel

### Security, monitoring and management

Designed to control, monitor and accommodate the efficient storage and dispensing of kerosene, diesel, gas oil, lubricants and AdBlue®, award winning fuel monitoring and management telemetry options are available. If security is an issue, tanks can be supplied with a fuel management package including fobs, locks and key codes.

These intelligent solutions provide stock visibility, traceability, sudden drop and leak alerts to give you a fuel management solution for total peace of mind. This means that you never need to worry about running out of fuel as you can monitor your usage levels wherever you are.

### Benefits for your business

- Improved security
- Improved staff protection
- Avoids insurance premiums and accident claims
- Eliminates the need for manual measurements and over-filling
- Automates deliveries
- Receive timely and accurate data for efficient purchases
- Monitor liquid levels anywhere via fuel monitoring app

## Robust products, manufactured for high performance

We know our fuel storage products can be located in some of the most demanding environments, which is why they are designed and engineered to meet and exceed local environmental guidelines, fuel storage standards and manufacturing regulations.

### Additional certification standard examples:

- BS799 Part 5 (Rectangular Steel Tanks)
- EN12285-2 (Cylindrical Steel Tanks)
- OFST200 (Steel Tanks)
- OFST100 (Plastic Tanks)

### Manufacturing standards:

- Manufactured under an ISO9001 quality management system
- ISO14001 environmental management system
- DFT paint tested (Steel Tanks)

## Your peace of mind, guaranteed

Previously price was often the first consideration when investing in a new tank, however security, health, safety and environment considerations are now paramount.

We are also members of the Fleet Operators Recognition Scheme (FORS), which assures our approach to safety, efficiency and environmental protection in our fleet operation, combined with a commitment to measure, monitor and improve our performance.

### A cleaner, safer approach

Mindful of the challenging environmental targets, pressure to reduce pollution and the increasing environmental regulations compliance that businesses today face, we can help you to make smart, well-informed fuel, storage and dispensing choices.

### Continual commitment to improvement

As a responsible business, we are working alongside our forward-thinking strategic partners to balance issues of performance and pollutant concerns, whilst delivering genuine cost-effectiveness.

Most recently our commitment to carbon neutrality and energy management system was awarded ISO15001.

### Working together to keep health and safety a priority

Health and safety is fundamental to our business performance, as well as being our commitment to you. Always committed to preventing injuries to our customers, colleagues and others who may be affected by our activities, our culture of strong safety and compliance principles drives our dedicated Safety First and Doing the Right Thing campaigns.

Fully compliant with all applicable legislation and industry codes of practice as a minimum standard, we strive to achieve industry best practice and continual improvement in our health and safety performance.

Our management systems are robust through accreditations in health and safety (BS OHSAS 18001) quality (ISO 9001) and environmental management (ISO 14001).
