

Keeping the transport industry moving

National network, local delivery
Total fuel management solutions with
reliable bulk fuel and lubricants supply

Fuel specialists

National network

Reliable, local delivery

Trusted by a broad range of transport providers nationwide, including haulage, logistics, buses, coaches, rail and marine, our 2,500 employees work as one team of fuel and sector specialists, providing flexible, innovative and tailored fuel solutions to best suit the individual needs of your business.

With 150 regional depots for bulk supply, 16 (and growing) bunker sites for self-serve fuelling of larger vehicles and access to 2,000 stations across the UK as part of our fuel card network - you can be assured that your fuel can always be delivered and accessed when, where and how you need it.

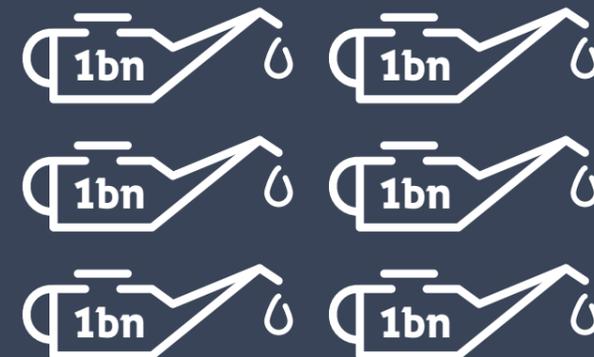

Assured supply and robust infrastructure, supporting our customers

6 billion

litres of high quality fuel and lubricants delivered throughout the UK each year

2,500 employees

150 local depots

16 and growing HGV refuelling bunker sites

over 2,000 stations within our fuel card network

Dependable fuel supply for road, rail and marine

As the UK's leading independent supplier of fuels and lubricants, our extensive infrastructure, innovative product range, reliable service and competitive pricing are designed to keep the transport industry on the move.

Understanding the transport industry

From haulage and logistics companies to bus and rail operators, procuring a reliable fuel supply, balanced with a shared responsibility to drive improvements in safety, sustainability and data sharing has never been so important.

76%
of all freight
journeys occur
on UK roads

57%

transport travel
is by bus

To help keep the nation's diverse and complex transport network operating efficiently and profitably, we work closely with our customers and wider industry bodies to ensure our offer fits the bill when it comes to helping you meet your goals in this changing political, environmental, technological and financial climate.

Why choose Certas Energy?

We're aware of the changing challenges faced by transport businesses nationwide and understand the need to provide quality products, service and value for our customers operating and maintaining different fleets.

Whether you're looking for supply on a spot-buy basis, a nationwide contracted tender, fixed pricing or a fuel cards contract for your fleet, we're committed to providing the right fuel solutions that work for your business.

Keeping fleets moving - keeping customers happy

Reputations are built on service and efficiency and we understand how important it is to receive your delivery on time and in full. With a fleet of over 900 vehicles nationwide, we deliver a comprehensive range of bulk fuels and lubricants to businesses, helping to ensure that you never run out.

Assured, cost-effective supply - always

Maintaining that competitive edge is crucial when margins are squeezed - likewise an assured supply is vital.

As the UK's largest distributor of bulk fuels, we have real buying power. And with a varied supply base from a range of leading oil refineries, we maintain consistently competitive bulk and pump prices, even in the most turbulent commercial climate, to always deliver the best possible value.

Smarter, more responsible fuel choices

Helping to ensure you are making responsible fuel choices, we are committed to reducing the environmental impact of our operations by minimising waste, protecting biodiversity and reducing harmful emissions.

Continually innovating through product development to bring fuel solutions that are compliant, more environmentally friendly and easier to transport, we take our social responsibilities seriously.

Dedicated to safety - FORS accredited

Like you, we spend a lot of time on the road, so health and safety is paramount for us - it is fundamental to our business, as well as being our commitment to you.

As a member of the Fleet Operators Recognition Scheme (FORS), this assures our approach to safety, efficiency and environmental protection combined with a commitment to measure, monitor and improve our performance.

Products that perform, service that adds value

We know how important it is to keep fleets performing profitably, safely and reliably, and our wide range of high performance fuels, lubricants and additives as well as essential accessories can help you do just that.

Our fuel and lubricants specialists will advise you on the most suitable products, whether your objective is to increase efficiencies, reduce emissions, maximise vehicle lifespan or monitor fleet activity – we're here to help you get the most from your fuel and fleet.

Bulk fuels

Standard high-performing and 'green' fuels, as well as packed fuels with a variety of dispensing options, ensures you have a choice to suit every application.

AdBlue®

If your fleet's engines are fitted with SCR catalysts, AdBlue® helps to reduce harmful emissions, meeting the standards for Euro V and Euro VI engines. Our AdBlue® is ISO 22241 compliant and available in a variety of packs including jerry cans, IBCs and bulk.

Additives

Additives help to reduce the cost of maintaining and replacing your fleet, as well as save you money by improving your fuel's performance and minimising storage problems and waste.

Lubricants

Reduce unplanned downtime and increase fleet lifespan

We supply a wide range of oils, greases and other lubricants from key original equipment manufacturer approved suppliers to ensure that you use only the best-suited products for your fleet – keeping maintenance costs down and productivity high.

With the largest independent logistics and distribution network and dedicated technical teams, you can rely on us to advise based on your needs and deliver stocked products within five working days – next day and emergency deliveries are also available.

Fuel cards

Providing full visibility of your fleet

With over 2,000 sites in our fuel card network and with a 1ppl discount on all Certas Energy fuel card diesel purchases, we can help keep your fleet on the move wherever they are in the UK and make significant savings on your fuel bill.

Working closely with our customers to create bespoke packages, competitive prices, flexible deals and bulk purchasing options, we can build a package to suit your needs and provide fleet insight through bespoke reporting to maximise cost and driver efficiencies.

LCV and HGV fleets can also benefit from our national network of refuelling bunker sites. Many offer truck stop facilities including truck washes, overnight parking, accommodation, bathrooms, cafes, licensed bars and even a barbers.

FuelTrace

Fully integrated telematics

Poor fuel efficiency, time-consuming administration, bad driving habits and fuel card misuse are all common causes of inefficient fleets.

Helping to reduce fuel costs by up to 25% by monitoring speeding, idling and poor driving styles, our FuelTrace vehicle tracking system uses GPS technology and on-board diagnostics to give you full visibility and accurate real-time data on all devices to implement efficiencies and minimise the risk of fraud within your business.

Shell GTL Fuel

A cleaner burning diesel alternative

Exclusively available from Certas Energy in the UK

Like your business, we're heavy users of the UK's transport network and take this responsibility seriously. Always innovating, we are committed to providing specialist, alternative fuels for a cleaner environment – enabling you to make smarter, more responsible fuel choices that meet your operational needs.

Following the introduction of the T-Charge, local authority-led Clean Air Zones and Euro VI standards, there is evidently an urgent need to tackle the air quality crisis in the UK, impacting transport businesses nationwide. The availability of alternative fuels offers a solution for organisations looking to reduce fleet emissions.

No engine modifications, simply drop-in

As the UK's exclusive distributor, we're proud to be able to supply Shell GTL Fuel, a drop-in, cleaner burning alternative to diesel. We understand upgrading to a low-emission fleet can bring logistical and investment challenges. With no engine modifications to new or existing fleets required, Shell GTL can have an immediate impact on fleet performance and emissions to improve air quality.

- NOx (harmful nitrogen oxide) emissions reduced by up to 37%
- PM (particulate matter) reduced by up to 90%
- Winter grade fuel all year round – no waxing up to -18°C
- Higher cetane number to improve reliability and power
- Increased storage life
- Improved cold start
- Quieter engines
- No diesel exhaust smell

Approved by leading manufacturers with many others able to provide warranties

Brakes reduces NOx emissions by 47% in Euro VI DAF fleet

Reducing emissions and improving local air quality was a priority for Brakes, the leading food wholesaler in the UK. Working with Certas Energy to switch their London-based Euro VI DAF fleet from diesel to Shell GTL Fuel, they have seen significant NOx reductions, along with many other benefits.

- 47% NOx reduction, confirmed by independent third party testing
- Reduced static regeneration of the Diesel Particulate Filter
- 0.4% increase in miles per gallon

“ Heavy-duty Euro VI compliant diesel engines emit very low levels of NOx and particulates, and by operating on Shell GTL Fuel, combustion is cleaner and emissions are further reduced. **DAF Trucks Marketing Manager** ”

“ Running Shell GTL Fuel in a city centre has a big impact on NOx emissions. We have not waited for future technology as there is no requirement to convert the vehicle. **Brakes Head of Indirect Goods and Services Procurement** ”

Always Certas

Dedicated to safety

Keeping customers, colleagues and the environment safe, our commitment to continual improvement in safety, quality and compliance drives our dedicated Safety First and Doing the Right Thing campaigns and is demonstrated through various accreditations.

- Health and safety (BS OHSAS 18001)
- Quality (ISO 9001)
- Environmental management (ISO 14001)
- Energy management (ISO 50001)

Saving lives on the roads

Our drivers are equipped with the confidence to provide potentially lifesaving support at the scene of a traffic accident. Collaborating with the road safety initiative Driver First Assist, we ensure all our drivers are trained and have the skills needed to help manage dangerous situations and assist those injured before the paramedics arrive.

Storage tanks and fuel monitoring

Keeping your fuel safe, secure and tracked

From tank size, shape and material to dispensing options and management, whatever you need – we've got it covered.

With capacities from 950 to 62,000 litres or larger as a bespoke option, all storage solutions are 110% integrally bonded to comply with oil storage regulations.

Ensuring the process is as easy for you as possible, you can opt for supply only or supply, installation and maintenance options. This includes assistance with contract lift on-site and removal of existing tanks, as well as full technical and after sales support.

Our tank locks and monitoring technologies can also keep your fuel secure, triggering automatic top-ups to ensure that you never run out.
